RECEP YILDIRIM

MUHAMMED SEMIH SALMAN

MUHAMMED FURKAN TARHAN

ZEYNEP KAYA

PROBLEM VE ÇÖZÜM AKIŞI

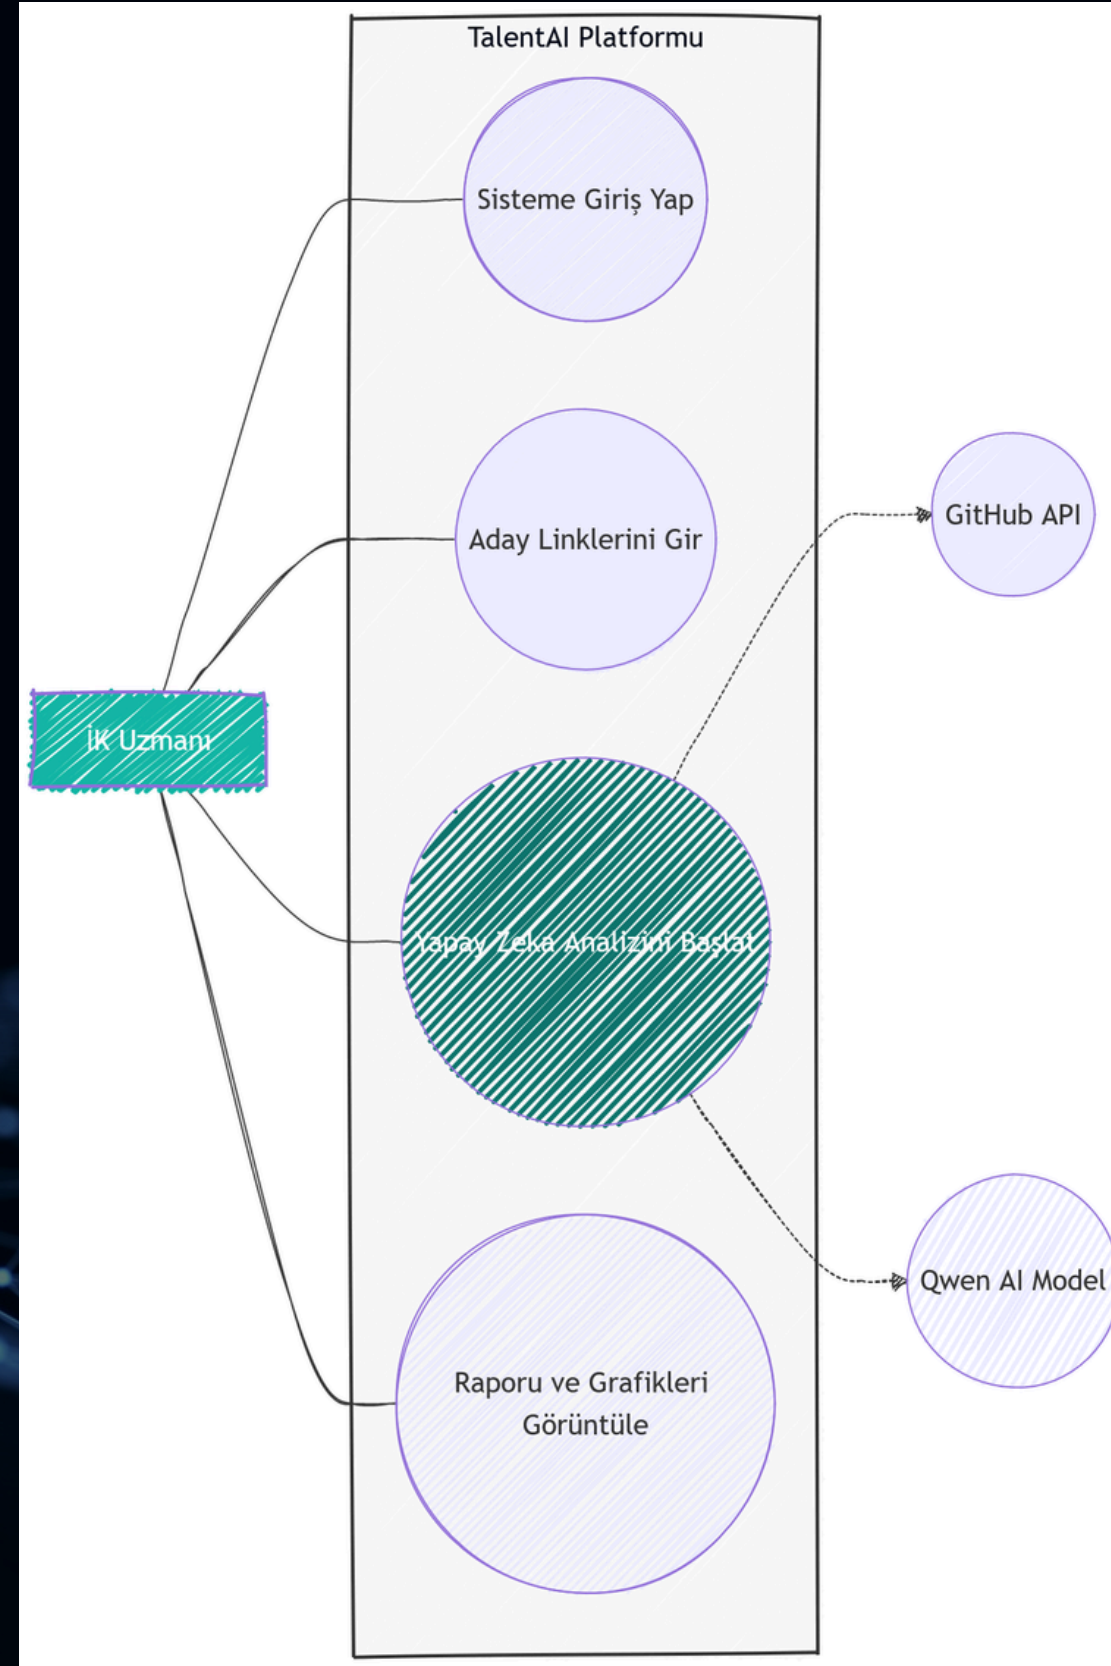

MEVCUT PROBLEM (GELENEKSEL ATS):

- SADECE ANAHTAR KELİME (KEYWORD) TABANLI CV FİLTRELEME.
- ADAYIN BEYANINA DAYALI, DOĞRULANMAMIŞ BİLGİ ANALİZİ.
- TEKNİK JARGONA HAKİM OLMAYAN İK UZMANLARI İÇİN "KARAR VERME" ZORLUĞU.

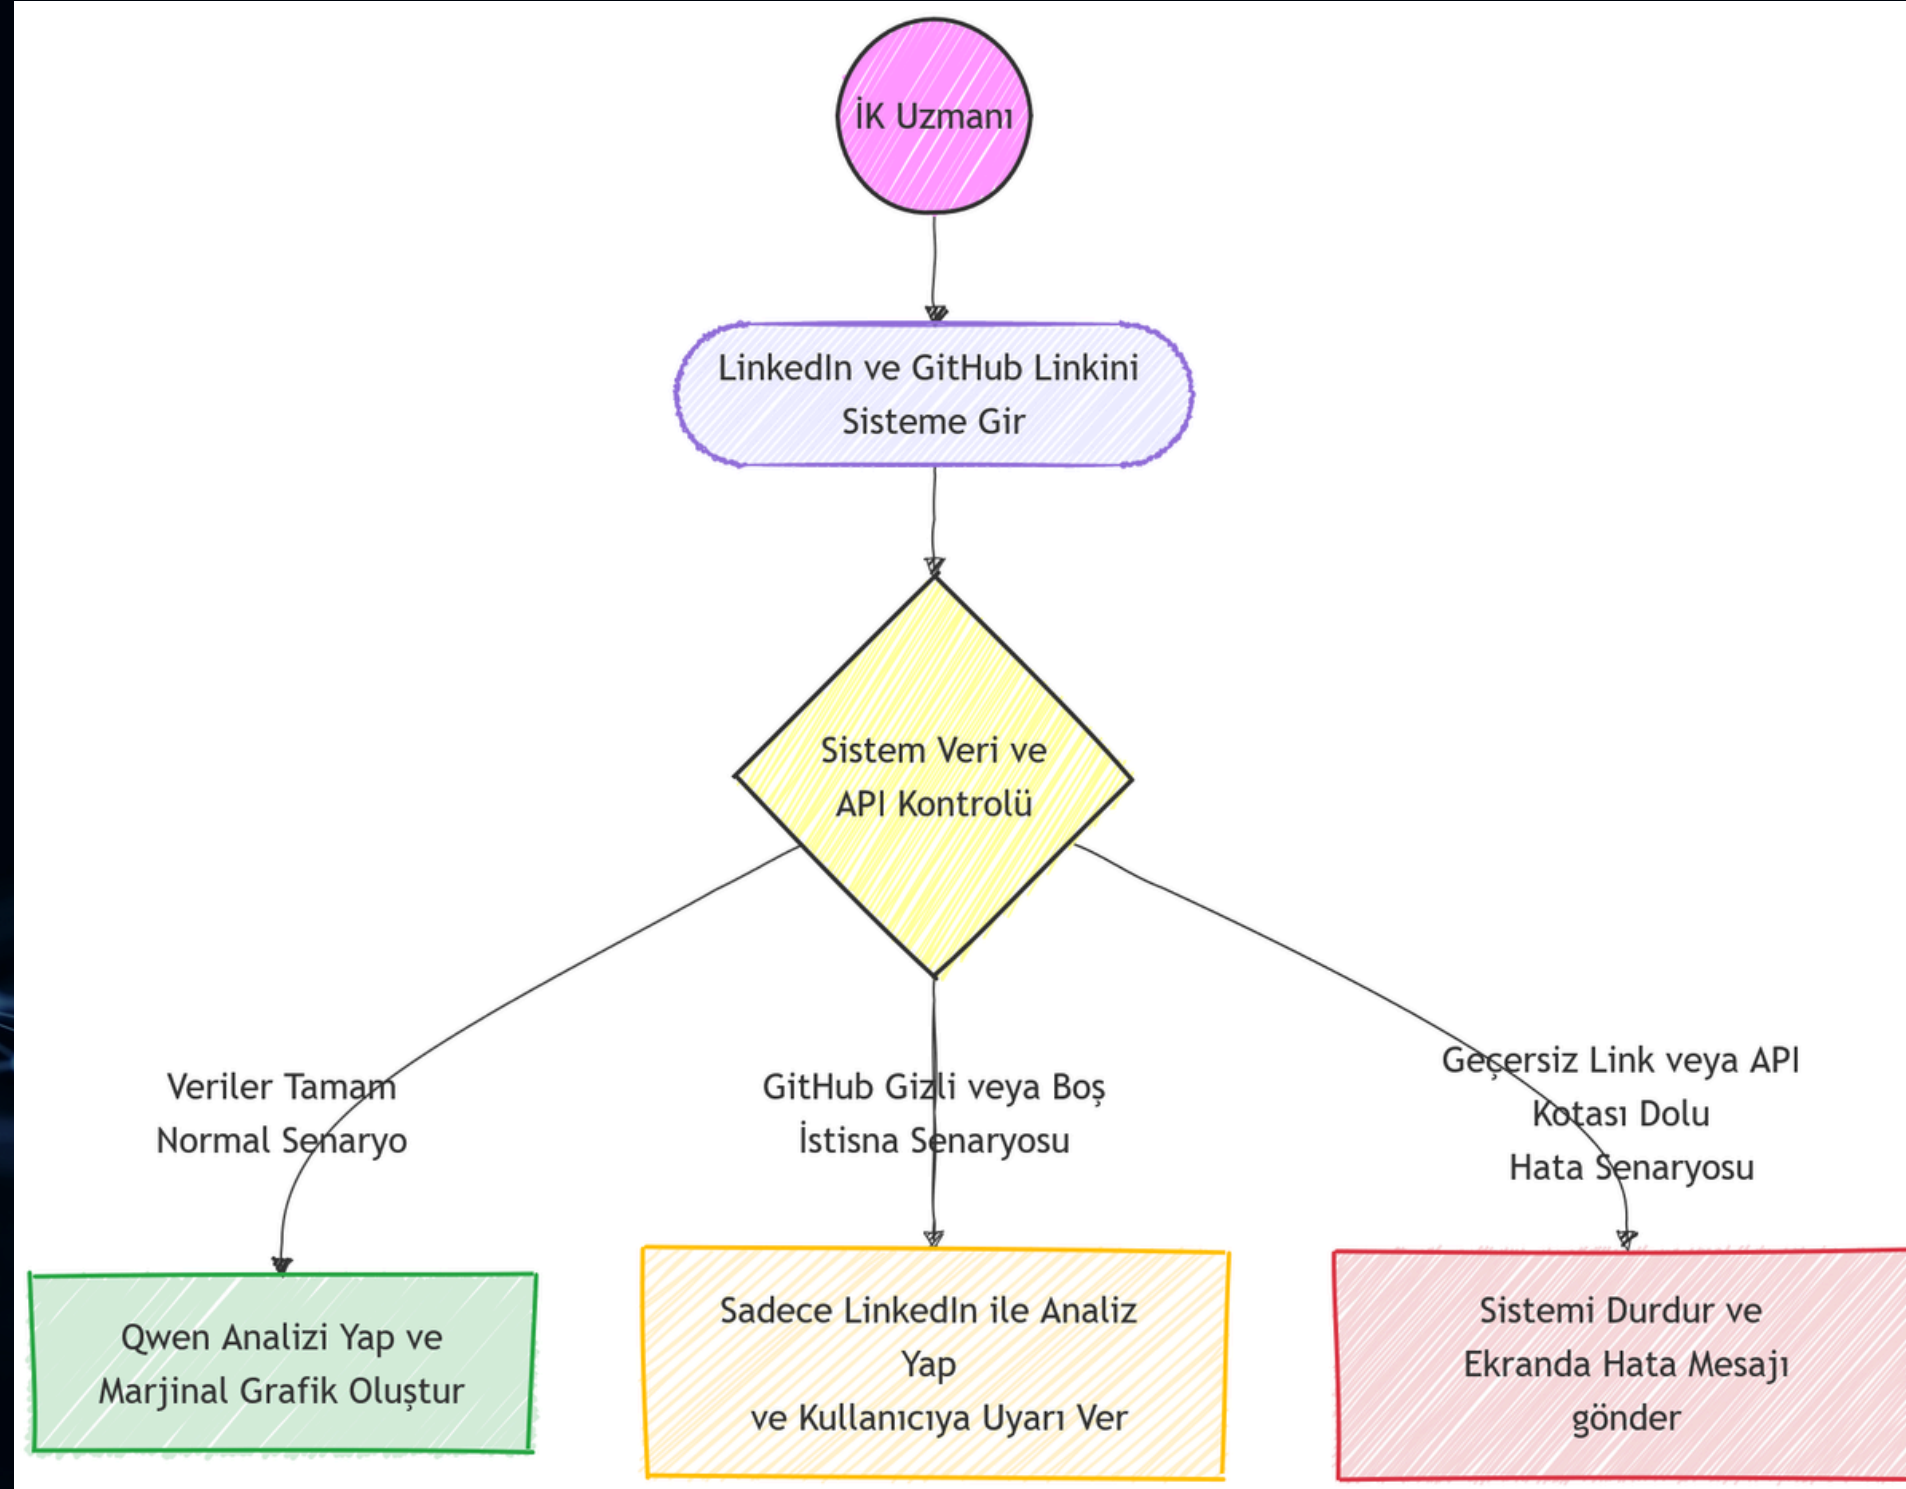

TALENTAI ÇÖZÜMÜ:

- CANLI VERİ ANALİZİ: ADAYIN GITHUB PROJELERİNDEKİ GERÇEK KODLARI LLM (QWEN) İLE ANALİZ ETME.
- TEKNİK UYUM SKORU: KARMAŞIK TEKNİK VERİYİ, İK UZMANININ ANLAYACAĞI SOMUT BİR PUANA DÖNÜŞTÜRME.
- DOĞRULANMIŞ YETKİNLİK: SADECE "BİLİYORUM" DİYENİ DEĞİL, "YAPANI" BULMA.

Interview

Realtime validation & scoring

Live

AI Interviewer

19:02

Welcome. We'll run a short technical interview while I validate your CV against GitHub signals. Ready?

You

19:02

Yes — let's start.

AI Interviewer

19:03

In your repos, I see multiple dashboards. How do you keep charts performant when data grows 10x?

You

19:04

I'd profile renders, memoize selectors, and virtualize heavy lists. For charts, I'd downsample and avoid re-mounting components.

Type your answer... (Enter to send, Shift+Enter for newline)

Send

Tip: Keep answers structured. Mention trade-offs, constraints, and verification signals.

STAR EVALUATION

Live

Situation

Described a production incident context.

✓

Task

Defined measurable reliability goals.

✓

Action

Needs more concrete implementation details.

⬇

Result

Outcome metrics not stated yet.

⬇

INSIGHTS

Explains trade-offs clearly; good decomposition.

Testing depth is inconsistent across projects.

Asks clarifying questions before implementing.
